Interoperability

Framework

- **Business Policy:** *A required outcome - Property stewardship*
 - **Business Process:** *An assemblage of business rules that collectively form a process. -- Physical Inventory Management*
 - **Business Rule:** *States what must or must not be done.*
Storage Activities must report the ending on-hand inventory balance to the item owner for all items having any balance effecting business activity that day.
 - **Business Object:** *A collection of data in a specified format that launches a process or reports process results.*
An order, inventory adjustment, request for payment, etc.
 - **Metadata:** *Characteristics of a data element. Inventory Balance Date = 8 numeric characters (yyyymmdd)*

DLMS Purpose/Mission

Business Process Transformation & Interoperability

Facilitate enterprise integration and continuous process improvements to logistics management and operations while maintaining interoperability by:

- Developing business rules that implement DoD policy
- Developing and managing the DoD logistics information exchange infrastructure
- Publishing detailed procedures that identify who does what, when, and how along the DoD logistics chain

What are the DLMS?

- **The Defense Logistics Management Standards (DLMS) are a broad base of process rules, data standards and electronic business objects (information exchange forms) designed to meet DoD's requirements for total logistics support.**
 - ✓ Developed in collaboration with representatives from the Military Departments, Defense Agencies, and participating Federal Agencies
 - ✓ Accommodates the new Enterprise Resource Planning (ERP) system processes and implementation, while supporting legacy system data exchange requirements.

Types of DLMS Support

- **Supports transitioning from the DLSS to the DLMS**
 - ✓ Replaces all of the DLSS transaction formats/associated procedures
 - ✓ Examples: MILSTRIP, MILSTRAP, MILSBILLS, MILSCAP
- **Supports new processes/capabilities not previously associated with a DLSS transaction**
 - ✓ Publishes the transaction format, adds data elements to DLMS Dictionary, and prescribes the business rules/procedures
 - ✓ Examples: Warehouse Service Advice/Response, Passive RFID Visibility, Catalog Data Exchange, IUID
- **Provides transaction formats for logistics processes that are not administered by the DLMSO**
 - ✓ Publishes the transaction format/adds data elements to DLMS Dictionary
 - ✓ Provides overview of process/references governing policy/process (no procedural detail)
 - ✓ Examples: Stock Readiness (Storage Quality Control Report and Stock Screening), Product Quality Deficiency Report, Weapon Systems Data Change **11**

INSTRUCTIONS

4. REQUESTED CHANGE(S):

- e. **Proposed Transaction Flow:** Illustrate for clarification where new transactions or revised routing rules are applicable.
- f. **Alternatives:** Identify and discuss known alternate approaches to resolve the problem or issue._

Brief Overview of Change

BAD EXAMPLE:

4. REQUESTED CHANGE(S):

- a. Brief Overview of Change: Fix the loading of the BLOC data in the DoDAAD.

GOOD EXAMPLE:

4. REQUESTED CHANGE(S):

- a. Brief Overview of Change: This change documents the procedures that are applicable to the Bill of Lading Code (BLOC) in the DoDAAD, and changes the source of input from the DoDAAD Administrators to the Authoritative BLOC information source, USTRANSCOM Reference Data Management (TRDM). This will improve timeliness and accuracy of the BLOC data.

Background

BAD EXAMPLE:

4. REQUESTED CHANGE(S):

- b. **Background:** Bill of Lading Office Code (BLOC) data incorrect in DoDAAD

GOOD EXAMPLE:

4. REQUESTED CHANGE(S):

- b. **Background:** The rules for how the Bill of Lading Office Code (BLOC) is used are documented in the Defense Transportation Regulation (DTR). The primary user of BLOC information in the DoDAAD is the DLA Distribution Standard System (DSS). The BLOC data in the DoDAAD is currently entered by the DoDAAD Administrators and it is unreliable. Of the 29,000 DoDAACs that contain BLOC information, all but 4 are set incorrectly.

Describe Requested Change in Detail

BAD EXAMPLE:

4. REQUESTED CHANGE(S):

- c. Describe Requested Change in Detail: Load BLOC from TMDS data.

GOOD EXAMPLE:

4. REQUESTED CHANGE(S):

- c. Describe Requested Change in Detail: The following procedures will correct the BLOC information in the DoDAAD:
- 1) Remove BLOC field from the DoDAAD web updated page and from Army and Air Force input systems.
 - 2) Clear the existing BLOC information from the DoDAAD database.
 - 3) Re-populate the BLOC information in the DoDAAD from TRDM.
 - 4) Transaction Services establish a link to import BLOC data updates from TRDM on a recurring basis.

Revisions to DLM 4000.25 Manuals

BAD EXAMPLE:

4. REQUESTED CHANGE(S):

- d. Revisions to DLM 4000.25 Manuals: No change.

GOOD EXAMPLE:

4. REQUESTED CHANGE(S):

- d. Revisions to DLM 4000.25 Manuals: This change will impact the DoDAAD User Guide maintained by Transaction Services.

~~C2.1.2.1.—Civilian government organizations (e.g., local government agencies or police department), contact the appropriate General Services Administration (GSA) DoDAAC Service Point to have a DoDAAC assigned.~~ ***Special Programs. Non-DoD and non-federal programs requiring DoDAACs are controlled under unique series DoDAACs beginning with numeric followed by alpha characters in the first two positions. Among others, the programs include programs authorized by Congress for state and local entities to purchase material from Federal sources. DoD/Federal Agency sponsors of these programs are designated as DoDAAC monitors. Contact DLMSO for guidance on establishing a DoDAAC series for a new special program.***

Proposed Transaction Flow

BAD EXAMPLE:

4. REQUESTED CHANGE(S):

- e. Proposed Transaction Flow: TRDM to DoDAAD.

GOOD EXAMPLE:

4. REQUESTED CHANGE(S):

- e. Proposed Transaction Flow: Transaction Services and USTRANSCOM will establish an automated interface between TRDM and DoDAAD to electronically transmit the initial update of the BLOC data field in the DoDAAD. After the initial load, any updates to the BLOC data in TRDM will be automatically pushed to the DoDAAD.

Alternatives

BAD EXAMPLE:

4. REQUESTED CHANGE(S):

- f. Alternatives: None.

GOOD EXAMPLE:

4. REQUESTED CHANGE(S):

- f. Alternatives: Continuing to rely on manual data entry of this information by the CSP will further perpetuate the unreliability of the BLOC data, both in data quality and timeliness, since the CSPs are not the authoritative source for BLOC data as it relates to transportation office DoDAACs.

Reason for Change

INSTRUCTIONS

5.REASON FOR CHANGE: Provide a description of why this change is being made.

Reason for Change

BAD EXAMPLE:

5.REASON FOR CHANGE: Bad data.

GOOD EXAMPLE:

5.REASON FOR CHANGE: BLOC data in DoDAAD is currently unreliable, both in data quality and timeliness of updates.

Advantages and Disadvantages

INSTRUCTIONS

6. ADVANTAGES AND DISADVANTAGES:

- a. **Advantages:** Identify both tangible and intangible benefits expected from adoption of the change. Include benefits both within and beyond the primary functional area of the DLSS/DLMS, especially benefits accruing to DOD. Address what happens if nothing is done. Quantify both tangible and intangible benefits and advantages. Show computation of dollar values where appropriate. Demonstrate why the proposed solution is more advantageous than the alternatives.
- b. **Disadvantages:** Indicate known or potential problems and costs associated with the proposal. Consider disadvantages both within and beyond the primary functional area of the DLSS/DLMS. Quantify both tangible and intangible costs and disadvantages. Show computation of dollar values where appropriate.

Advantages & Disadvantages

BAD EXAMPLE:

6. ADVANTAGES AND DISADVANTAGES:

- a. Advantages: Better BLOC data.
- b. Disadvantages:

GOOD EXAMPLE:

6. ADVANTAGES AND DISADVANTAGES:

- a. Advantages: The change will ensure that BLOC data is maintained in a current and accurate condition from the authoritative data source.
- b. Disadvantages: None noted.

Assumptions/Additional Comments

INSTRUCTIONS

7. ASSUMPTIONS USED OR WILL BE USED IN THE CHANGE OR NEW DEVELOPMENT:

(OPTIONAL) Indicate any assumption about the existing environment that may impact the development or implementation of the proposed change.

8. ADDITIONAL COMMENTS TO CONSIDER:

(OPTIONAL) Indicate any additional comments to consider not previously described.

9. ADDITIONAL FUNCTIONAL REQUIREMENTS:

(OPTIONAL) Indicate additional functional requirements not documented elsewhere.

Implementation Target/Cost Savings/Avoidance

INSTRUCTIONS

10. ESTIMATED TIME LINE/IMPLEMENTATION

11. ESTIMATED SAVINGS/COST AVOIDANCE ASSOCIATED WITH IMPLEMENTATION OF

THIS CHANGE: If known, indicate estimated savings or cost avoidance associated with this change.

Implementation Target

BAD EXAMPLE:

10. ESTIMATED TIME LINE/IMPLEMENTATION TARGET: Unknown.

GOOD EXAMPLE:

GOOD EXAMPLE:

11. ESTIMATED SAVINGS/COST AVOIDANCE ASSOCIATED WITH IMPLEMENTATION OF THIS CHANGE: None noted.

Impact

INSTRUCTIONS

- 12. IMPACT:** Any additions or changes to data elements will be inserted by DLMSO. (Example: Data Content/Procedures: Identify additional specific information requirements that will be added, revised, or deleted as a result of this change.)
- a. New DLMS Data Elements:** Example: This PDC/ADC adds the following new DLMS Data Elements; they are not included in any previous DLMS transactions. Provide the data element name with the definition and data characteristics.
 - b. Changes to DLMS Data Elements:** Example: This PDC/ADC changes the usage of the following existing DLMS Data Elements. Provide the data element name (or revised data element name) with the revised definition and/or revised data

Administrative Update to DLMS 830D, Demand Data Exchange (DDE)
Projected Supply Plan (Supply)

- 1. ORIGINATING SERVICE/AGENCY AND POC INFORMATION:** DLA Logistics Management Standards Office, Ms. Mary Jane Johnson, (703) 767-0677; DSN 427-0677 or email: Mary.Jane.Johnson@dlm.mil.
- 2. FUNCTIONAL AREAS:** Supply
- 3. REFERENCES:** DLM 4000.25, DLMS, Volume 2, Supply Standards and Procedures, www.dla.mil/j-6/dlmso/elibrary/manuals/dlm/dlm_pubs.asp
- 4. APPROVED CHANGE(S):**
 - a. Brief Overview of Change:** Administrative update to DLMS 830D, Demand Data Exchange (DDE) Projected Supply Plan transaction to correct the usage for Loop ID LM at 2/LM/3900 from “Must Use” to “Used”. Other administrative updates are noted in the change table.
 - b. Background:**
 - (1)** The LM Loop/segment at position 2/LM/3900 is incorrectly identified in the DLMS 830D as Must Use. The only authorized code value in the LQ segment of the Loop ID LM at position 3900 is optional, so the LM Loop is optional and should not be identified as Must Use.
 - (2)** Other administrative updates are also being made consistent with changes being made in DLMS transaction names from DLMS Supplements to Implementation

Common PDC Questions & Answers

- **Where are the instructions for filling out a Proposed DLMS Change?**
 - **DLM 4000.25, Volume 1, Chapter 3, and on DLMS Web site under quick links, “Defense Logistics Manuals” or “DLMS Process Changes”**
- **Who can prepare and submit a Proposed DLMS Change?**
 - **Anyone, but it must be submitted to DLMS via the Component designated representative to the applicable DLMS Process Review Committee.**

Common PDC Questions & Answers

- **Why aren't the PDC #s that become approved DLMS changes (ADCs) perpetuated as the ADC #.**
 - **Historically, there was not a one-to-one relationship of PDCs to ADCs; not all PDCs are approved, multiple PDCs may be approved as a single ADC, etc.**
 - **When the ADC was published, it always identified the PDC # or #s under which it was originally staffed.**
 - **Effective January 2012 in the 1000 series of DLMS changes, the PDC and ADC numbers will match.**
- **How long does the PDC/ADC cycle take?**
 - **Depends on complexity, priority of the change and how well PDC(s) are developed. Could be as little as 30 days for administrative changes**

Summary

- **DLMS is a broad base of DoD-approved business rules, standards, objects and processes designed for total logistics support.**

- **Anyone can submit a proposed DLMS change (PDC) through their designated DLMS Process Review Committee (PRC) representative.**
- **Instructions are contained in the DLMS Manual, DLM 4000.25-M, Volume 1, Appendix 1 & the DLA Logistics Management Standards office web site.**
- **DLA Logistics Management Standards office chairs the DLMS PRCs which review, staff and revise PDCs until they, in most cases, become and are published as approved DLMS changes (ADCs).**
